TESTING...

SHAVING IS A QUICK INDICATOR OF SHARPNESS. MOST FACTORY AND CUSTOM KNIVES DO NOT EXHIBIT THIS SHARPNESS WHEN FIRST USED. ALL COLD STEEL® KNIVES ARE SHAVING SHARP, RIGHT OUT OF THE BOX!

THE TRAIL MASTER FLEXED IN A VISE WITH THE HELP OF A THREE FOOT PIPE FOR LEVERAGE. MOST COMPETITOR'S KNIVES SHATTER WELL BEFORE THEY REACH THIS POINT.

CRITICS SAY THAT PRACTICALLY ANY KNIFE CAN BE STABBED THROUGH A CAR DOOR... BUT, UNLIKE OTHER KNIVES, OUR GUNSITE™ FOLDER'S REINFORCED TANTO POINT IS REMARKABLY UNAFFECTED BY THE ORDEAL.

COLD STEEL FOLDING KNIVES HAVE BEEN TESTED (AND PROVEN) TO WITHSTAND MORE WEIGHT PRESSURE ON THEIR LOCKS THAN 99% OF OUR COMPETITOR'S LIKE MODELS.

RETAINING AN EDGE WHILE REPEATEDLY CUTTING PINE WOOD INDICATES SUPERIOR FINE EDGE RETENTION. WE MAXIMIZE THIS POTENTIAL IN OUR KNIVES.

THE VAQUERO® GRANDE PLOWING THROUGH 3" OF FREE HANGING MANILA ROPE.

MANILA ROPE IS VERY TOUGH ON A KNIFE EDGE. BLADES THAT CAN REPEATEDLY CUT THIS ROPE WILL LAST INDEFINITELY UNDER NORMAL FIELD USE.

STEEL & HEAT TREATMENT

CARBON V®

Some of our Cold Steel® knives are made from Carbon V®, a high carbon, low alloy cutlery grade steel. This steel is superior in performance to most other steels due to its chemistry and also because of the close controls that we maintain at every stage of the manufacturing process. These controls begin at the steel mill where Cold Steel® specifies the desired microstructure of the steel. Once smelted, each steel shipment is microscopically checked for structural quality, cleanliness and chemical content by an independent metallurgist not in the mill's employ. The blades are then blanked parallel to the rolling direction of the steel plate to optimize grain flow along the length of the blade. The final step is a precise heat treatment sequence that was developed by Cold Steel® specifically for this custom steel. This heat treatment process is one of our most highly guarded trade secrets. It was arrived at over several years by using an exhaustive series of practical and metallurgical tests and observations.

AUS STAINLESS

The words "stainless steel" are misleading, because, in fact, all steel will stain or show discoloration if left in adverse conditions for a sufficient time. Steel is made "stainless" by adding Chromium and reducing its Carbon content during the smelting process. There is a serious performance trade-off with stainless steel. As the Chromium increases and the Carbon decreases, the steel becomes more "stainless". But, it also becomes more and more difficult to sharpen, and the edge-holding potential is seriously impaired. This is usually why most stainless knives are rarely razor-sharp and quickly lose what little edge they have.

In contrast, at Cold Steel® we use AUS 8A Stainless, a high carbon, low chromium steel that has proven itself to be the ultimate compromise between toughness and strength, edge holding and resistance to corrosion.

AUS 6A is a medium to high carbon stainless which is tougher than ATS-34, 440C, ATS-55, etc., but still holds a good edge. This means it is particularly well suited for heavier, longer blades that are subjected to a lot of stress while chopping and hacking.

Like our other stainless steels, AUS 10A is a high carbon variety. It is equal in strength and toughness to AUS 8A but has the extraordinary advantage of an additional 20% in edge holding ability. This gives it a wide performance advantage over other steels like ATS-34, ATS-55 and 440V. The only knives Cold Steel® is currently manufacturing in AUS 10A Stainless steel are the Triple Action™ Folding Knives.

SAN MAI III®

San Mai means "three layers". It is the term given to the traditional laminated blades used by the Japanese for swords and daggers. Laminated construction is important because it allows different grades of steel to be combined in a single blade. A simple way to think of this type of construction is to imagine a sandwich: The meat center is hard, high carbon steel and the pieces of bread on either side are the lower-carbon, tough side panels. The edge of the blade should be hard to maximize edge holding ability, but if the entire blade was hard it could be damaged during the rigors of battle. For ultimate toughness the body of the blade must be able to withstand impact and lateral stresses. Toughness is generally associated with "softness" and "flexibility" in steel, so that, surprisingly, if a blade is made "tough" the edge will not be hard enough to offer superior edge holding. San Mai III® provides a superior blade with hard (higher carbon) steel in the middle for a keen, long lasting edge and tougher (lower-carbon) steel along the sides for flexibility. This laminate is 25% stronger than the incredibly tough AUS 8A Stainless.

420 SUB ZERO QUENCH

Cold Steel® has always sub zero quenched the blades that we have manufactured in Japan, and we are now adding this often omitted, yet crucial, process to the heat treating sequence of the new blades we are making in Taiwan.

Typically, stainless steel blades suffer from retained austenite after they have been heated to critical temperature and then air or gas cooled. The big drawback of this procedure is that it doesn't get the blades cold enough to assure complete transformation from an austenite to martensite grain structure. Only by freezing—sub zero quenching—stainless blades to 120 degrees below Zero (Fahrenheit), will the austenite be completely transformed to martensite. This, in turn, assures the blade will be as hard, strong, and wear resistant as it can possibly be.

5150

5150 is a medium carbon, low alloy steel that is particularly well suited to the hot forging process. This steel has the properties to harden well, making it ideal for heat treating blades that have a very thick cross section such as tomahawks, axes, etc. After the quenching process, blades will be completely hardened at Rc 55-60. The combination of carbon and alloy elements also produces an extremely tough and impact resistant steel in the hardened and tempered condition which is essential in a tool which is hafted and or thrown.

THESE DESTRUCTIVE TESTS CONSTITUTE GROSS ABUSE OF A KNIFE. DUPLICATING THEM WILL VOID YOUR WARRANTY.

#VC90 PROOF Video

VOYAGER SERIES

Due to their light weight and convenience, Zytel® handled lockbacks have gained enormous popularity over heavier, traditional lockbacks with their metal bolsters and wooden scale handles. Our Voyager® Series is the latest generation of these ultra-light knives and they are sure to be the standard by which others are judged for years to come!

The newly redesigned Voyagers® are made from the same premium stainless steel that goes into our famous Tanto. They feature precision milled and hand fitted parts with extra stiff springs. This provides a lock that is safer and stronger than most traditional folders. The blades are extremely wide and ground thin at the edge for tremendous shearing potential. This thin edge allows us to hone the blade to astounding sharpness. Plus, the cutting surface is continuously curved along its entire length for the most efficient possible slicing action. Because of the high carbon content in the stainless steel, you'll find that the sharpness really lasts a surprisingly long time.

If you like serrations, you'll really appreciate our exclusive pattern. It offers the aggressive ripping action of serrated teeth, but with a twist. Our design

features groups of very small teeth separated by wide, shallow arcs. This results in the benefits of both a plain and a serrated edge, so that the knife still cuts smoothly through almost any material.

The Voyager® Series offers all the advantages of the latest in lockback construction technology including lightning-quick one-handed opening, light weight and strength, yet without the necessity for unsightly humps or holes in the blade. The result is an appealing look with very modern styling. Every detail has been designed for maximum performance from the reinforced pivot pin and stainless steel pocket clip, to the grooved thumb shelf on the back of the knife for extra traction. Each handle in the newly redesigned Voyager® Series is now more oval shaped in cross-section. Technically, the handle is a full 20 percent thicker, increasing strength and stiffness. Yet, the handle doesn't feel or appear thicker due to the improved contoured design.

As tools, these lightweight, super sharp knives are appropriate in almost any environment from hunting and camping, to hiking and general utility chores. They can also readily fill specialty functions such as a boat or river knife, a chute knife or demanding police/survival/rescue applications.

SPECIALIZED VOYAGERS

TUFF-LITE™

Tough enough to do the job and light enough to be handy, the Cold Steel® Tuff-Lite's™ are there when you need them. They come complete with a lanyard hook so they easily attach to any keychain, belt loop, zipper pull, or neck lanyard.

Quality counts, even in small packages, so we made the Tuff-Lite™ Voyagers® with reinforced pivot pins and lockwork that is capable of holding more than 40 pounds! The Tuff-Lites™ are flat and light enough to be carried all day without effort, even in the pockets of tropical weight pants.

LAND & SEA/RESCUE™

When seconds count, the Land & Sea/Rescue™ Knife is more than equal to the challenge. The blade of the Land/Sea Rescue™ knife was designed specifically for emergency use. With its "sheepsfoot" point, it can safely cut away clothing from an accident victim, and it will make short work of a seat belt, especially when time is of the essence.

GUNSITE™

Cold Steel® is right on target with the Gunsite™ Folders — the first authorized and officially endorsed knives of the Gunsite™ Training Center.

The Tanto style blades feature a 50/50 serration pattern, jimping on the spine for a steady grip, and each is ground with a false edge on top. Nothing compares to the fit and finish of the Gunsite™ Folders, with precision parts milled and hand fitted to virtually custom quality.

Like all of our Voyagers, the Gunsite™ folders come with a stainless steel pocket clip for easy carry.

SEE THE ENTIRE SPECTRUM OF VOYAGERS ON THE FOLLOWING PAGES

• AUS 8A STAINLESS BLADES

Reminiscent of a 1950's styled "James Dean" switchblade, our new Ti-Lite™ tactical folder, echoes the swift lines of a memorable classic.

TI-LITE™

Legal to carry almost everywhere, the AUS 8A stainless steel blade features a razor edge and sturdy needle sharp point. The handle, made of forged Titanium, has been CNC milled for a dashing look, and for maximum strength and safety, we have equipped our Ti-Lite™ with a full length Titanium leaf spring lock (proven, in our tests, to hold 100lbs).

For ease of carry, the Ti-Lite™ comes equipped with a small, unobtrusive steel pocket clip.

We would like to thank custom knife maker Phil Boguszewski for his design influence in the creation of the Ti-Lite™.

Specifications: Ti-Lite™ #26S

Blade:	4"	Overall:	8 3/4"
Thick:	1/8" (3mm)	Weight:	4.6oz.
Steel: AUS 8A Stainless Blade with Titanium Handle			

Ti-Lite™

Packing an awesome punch, Cold Steel's Triple Action™ Folding Knives prove that formidable power and strength in a folding knife do not require the weight of an anvil. With a convenient pocket clip, and a closed length of only 5 inches, the 3.5 ounce Triple Action™ Folders are a dynamite innovation.

TRIPLE ACTION™

Cold Steel® is the first to offer a high quality folder featuring **AUS10A Stainless Steel** providing superb cutting ability with the finest combination of strength and flexibility.

The aircraft grade aluminum handle is roll engraved with a distinctive pattern, giving the Triple Action™ an exceptional finished look.

Specifications: Triple-Action™

	#24TAT Tanto Serr.	#24TATP Tanto Plain	#24TAD Double Edge

Weight:	3.7oz.	3.7oz.	3.6oz.
AUS 10A Stainless Steel blades. Roll Engraved Aircraft Grade Aluminum Handle.			

Triple Action Tanto Plain Edge (#24TATP)

The superior lock is as tight as a bank vault.

Triple Action™ Tanto Serrated. Also available with a plain edge.

Triple Action™ Double Edge

Our craftsmen have captured the time-less quality of superior cutlery and united it with the finest in modern materials. The result is a dazzling, high impact leaf-spring folder like no other knife available.

SCIMITAR™

The Scimitar™ blade is hollow ground and honed to razor sharpness. It has been designed to facilitate the most effective cutting stroke known to man, the draw cut.

Superior engineering combines traditional appeal with the latest Western technology in the contoured Zytel® and steel frame handle. The pistol grip handle allows a forward, reverse, or palm reinforced grip while finger grooves, checkering, a pocket clip and hard-hitting pommel contribute to its ease of carry and rock steady grip.

Specifications: Scimitar™

	#25SS (Serrated)	#25SB (Black)	#25S (Plain Edge)
Blade:	4"	Overall: 9"	Thick: 7/64" (3.5mm)

Plain Edged Scimitar (#25S)

Black Scimitar™ Teflon™ Coated Blade with Blackened Fittings.

Scimitar™ Serrated. Also available in a plain edged model.

Our distinctive Nogales™ Clip Point blades are ideal for shearing through thick, fibrous materials like manila rope, cable, hose, and belts. They feature double thumb studs for ambidextrous, lightning fast opening, and jimping on the blade spine to provide the thumb with extra purchase and control. Plus, they have lightweight Zytel® handles with stainless clips, making it easy to keep your Nogales™ folder nearby at all times.

NOGALES™ FOLDERS

Fashioned from AUS 8A Stainless steel (which out-performs ATS-34), these blades are precision flat ground to form a long shallow "V" cross section. The edges form a sinuous double curve. This means that whatever material is struck with the inward curving portion of the edge (nearest the hand) will automatically force the remaining outward curved edge entirely through.

The Nogales™ Series folders are available in a range of sizes from the compact, versatile El Lobo™ to the awesome cutting power of the Vaquero® Grande.

Vaquero Grande™

Vaquero Grande™

RECON 1 Cold Steel® is famous for raising the bar in the knife industry and our new Recon I tactical folders are sure to set a new standard that will be hard to beat. Why? Because they are as tough as nails and will cut like a chain saw! We have pulled out all the stops when we made these knives.

Every facet of their construction has been over engineered to make them as strong, durable and effective as humanly possible. The blades are made out of our proven AUS 8A stainless steel and the handles are thick Zytel®, massively reinforced by heat treated steel liners and five locking bolts. To compliment their super tough blades and handles they each feature our rev-

olutionary Ultra Lock™ (patent pending) which practically precludes lock failure. To compliment their tactical mission we have given each blade a tough black Teflon® finish. Our testing has shown this coating or finish offers three major advantages for use on tactical blades. The first is it is highly resistant to scratches and abrasions while keeping rust

at bay. The second is it eliminates glare and light reflections which may give its user away. The third is it's a superior lubricant which causes the blade to slip through even tough material with markedly less friction. This means you can cut deeper and far longer than with a non Teflon® coated blade.

To make the Recon I as easy to carry as possible we have equipped each knife with a small, extra strong pocket clip. This clip is completely ambidextrous so lefties take note. What's more its diminutive size doesn't abrade and irritate the palm under protracted use like a larger clip would.

Specifications: Recon 1— Tactical Folder Series

ULTRA LOCK™ After 2 years of experimentation and testing, Cold Steel® is proud to introduce our new Ultra Lock™. We believe this revolutionary locking mechanism (patent pending) is as "fool proof" as it gets and represents a big advancement in safety.

The way the lock works is as the knife is opened the blade rotates in a semi circular manner around the locking pin via a larger cut channel in the blade tang. Then just prior to reaching the fully opened position the spring loaded locking pin moves forward through the oncoming straight portion of the tang channel until it "dead ends". At this point the blade is rigidly locked open and can't budge even a fraction of an inch as the locking pin is surrounded by solid steel which prevents any movement of the blade. In fact this lockup is so strong it can only be overcome in two manners. The first is to apply so much force to the blade that the locking pin shears off or breaks through the solid steel blade tang. The second is to manually retract the locking pin far enough that it escapes the straight part of the channel. Once this is done the curve portion of the channel can engage it and once again rotate it as the blade is closed.

The Recon I comes complete with an ambidextrous black steel pocket clip.

TAI PAN

The Tai Pan™ embodies all the best features of a classic dagger while minimizing its shortcomings. Most daggers are notorious for thin, easily broken points. In contrast, the Tai Pan™ features a sturdy spear point which is wide and thick enough to resist breaking.

As with the Tanto, the Tai Pan™ has a tapered, black Kraton® handle with a unique flattened oval cross section. Over time, this material and handle shape have proven ideal at preventing the knife from shifting or turning in the hand even under the worst circumstances.

Our Imperial version of the Tai Pan™ shares many of the attributes of our regular version, yet differs markedly in its aesthetic styling. In the traditional Japanese way, the Imperial Tai Pan™ features a braided, cord wrapped handle in the centuries-old "cross over" pattern, with a unique underlying base of "Samé" or ray skin.

The razor sharp blade is 161-layer San Mai Damascus steel. This rare steel consists of two 80 layer sections laminated around a hard stainless core. The end result is a visually breathtaking and virtually unbreakable blade.

Tai Pan™ (upper)
Imperial Tai Pan™ (lower)

The Imperial Tai Pan™ is individually serial numbered 001-500 and comes complete with a certificate of authenticity.

Specifications: Tai Pan

	#13D Tai Pan™	#13DDC Imperial Tai Pan

Weight:	10.8oz.	9.4oz.
Steel:	AUS 8A Stainless	San Mai Damascus
Handle:	Kraton®	Cord Wrapped Samé (Ray Skin)

300 Series Stainless guards, bolsters, and pommels. (The Imperial Tai Pan features mirror polishing on these areas.) Each includes a high quality leather sheath.

OYABUN

The Japanese word "Oyabun" means "Boss," the undisputed leader, with authority over all his subordinates, including his "Kobun" or soldiers.

A larger and slightly thicker version of our Kobun™ (see page 14), the Oyabun™ blade features a high, double-sided hollow ground bevel that's thin at the edge to facilitate razor sharpness.

The Oyabun™ handle has a deeply checkered Kraton® surface with an internal liner of Zytel®. Relatively thin overall, the handle is deeply contoured in cross section to enhance grip strength and control.

Specifications: Oyabun #19BT

Blade:	9"
Handle:	5 1/16"
Overall:	14 1/16"
Thick:	3/16"
Weight:	8.3 oz.
Steel:	420 Sub Zero Quench with Bead Blast Finish
Sheath:	Secure-Ex™

TANTO

Exhibiting an unequaled level of craftsmanship, the knives in the Tanto Series feature a lustrous satin finish on the hollow ground blade bevels and a line grain finish on the flat spine. These two finishes characterize our state of the art grinding technique and accentuate the Tanto's unique appearance.

Tanto: The knife that started the Cold Steel® legend. It features a beautiful stainless steel guard and pommel and a virtually indestructible 6" blade.

Master Tanto: Comparable to the original, except that its blade is San Mai III®, making it approximately 25% stronger.

Magnum Tanto II: Just two ounces heavier than the Tanto, the Magnum Tanto II provides a full 30% increase in cutting power. Combine that with the visual impact of a tsuba-style (sword) guard and you have perhaps the ideal Tanto. The Magnum Tanto II features a blade made from San Mai III®.

Magnum Tanto IX and XII: These knives were created in response to popular demand for a longer Tanto. They are available with 9" or 12" blade lengths, and both feature our exclusive San Mai III® laminated steel.

ALL TERRAIN HUNTER

To put it simply, considering product versus price, Cold Steel's® All Terrain Hunter is one of the best knife values on the market today. At home in the outdoors, this latest addition to our line weighs only 4.4 ounces and can be carried anywhere with confidence.

The All Terrain Hunter's 4 1/2-inch Carbon V® steel blade is honed to razor sharpness and black epoxy powder coated for added protection from the elements. Its shock absorbing Kraton® handle is finger grooved and checkered for a sure grip. A lanyard hole facilitates easy access. The self-draining sheath is of hard polycarbonate with an integral belt loop.

Specifications: All Terrain Hunter #36E

Steel:	Carbon V® with Black Epoxy Powder Coat
Overall:	9 1/2"
Black Polycarbonate Sheath	

PENDLETON HUNTERS

Our president, Lynn Thompson, bought the first knife custom maker, Lloyd Pendleton ever made in 1973. Now these friends have collaborated to produce two of Lloyd's most popular knives, we call them the Lloyd Pendleton Hunter and Mini Hunter.

In fabricating these knives, we have tried to duplicate Lloyd's work as accurately as possible. Both blades are hollow ground and honed to perfection and the handle's cross sections and contours match Lloyd's handmade knives exactly. For safety and durability, we have dispensed with leather in favor of Secure-Ex™ for the sheaths. This material won't rot or mildew and is far more resistant to cuts or punctures than leather.

Specifications: Lloyd Pendleton Hunters

Classic Trapper

CLASSIC STOCKMAN

The Stockman style pocket knife first emerged on the cutlery scene in the 1890's and appears to have evolved from the popular cattle knife of the western plains. Our versions are available in two sizes, we call them the Classic Stockman and the Classic Junior Stockman. They are both built on Serpentine style dies and come with brass frames, Carbon V® springs, nickel silver bolsters and faux jugged bone handles.

Each knife comes with a clip point, sheepsfoot and spey blade made out of our famous Carbon V® steel. These blades have been honed razor sharp and will prove equally useful on the ranch, farm, or in the city.

CLASSIC TRAPPER

Whether you're a hunter, trapper, or all around outdoorsman, you're sure to appreciate our new Classic Trapper. It is built on a 4" swell center jack knife die and boasts two big working blades. The master blade is almost 3 1/2" long and features a long clip point, useful for sticking and general utility work.

The second blade is an equally long spey blade used for skinning. Both blades are flat ground from Carbon V® steel and expertly tempered for an edge that really lasts. The handle of our Trapper consists of a brass frame with Carbon V® springs, nickel silver bolsters and gorgeous faux black jugged bone handle scales.

MASTER HUNTER

The new standard for an American-made hunting knife, the Master Hunter and Master Hunter Plus employ a broad blade which is flat ground extra thin with a distinct distal taper for unprecedented cutting ability, edge retention and ease of re-sharpening. The Master Hunter is available in AUS 8A stainless and Carbon V® steel, while the Master Hunter Plus, complete with guthook, is available in Carbon V®. The comfortable, deeply checkered Kraton® grip encourages long use without fatigue. The Master Hunter has been extensively field tested in Africa, Australia, Alaska and Colorado and has won the praise of many of the world's finest hunters.

FILET KNIVES

Now you can filet a fish with a keen blade that lies flat against the backbone and cuts just as if were going through butter.

Honed from $\frac{3}{32}$ " thick Carbon V® steel, our Filet blades are stronger and tougher than the competition's and they hold their sharp edges longer than any stainless blade.

The key to the Filet Knife's cutting power is an approximately 20% wider blade than most of our competitors. This allows for a long, shallow "V" cross section, a wider grind, and a thinner edge which ultimately makes for a sharper knife.

Specifications:

Filet Knives	Blade Length	Overall Length	Knife Weight
#90WFSZ:(Small)	6"	11"	4.7 oz.
#90WFMZ:(Med)	7 1/2"	12 1/2"	5.2 oz.
#90WFLZ:(Large)	9"	14"	5.5 oz.

3/32" thick Carbon V® Steel w/ Black Epoxy Powder Coat. Deeply checkered Kraton® handles. Polycarbonate sheaths.

BIRD & TROUT

The Bird & Trout Knife is a modern version of a 100-year old classic, treasured by hunters and fishermen for generations. Its enduring popularity is enhanced by its ultra slim profile, and unique all steel construction.

The skeletonized handle offers great versatility and freedom of movement. It's perfect for working in tight places or making precise cuts. The ring allows the knife to hang from the little finger when not in use and yet remain instantly available.

For safety and handiness, each knife comes with a Concealex® neck sheath and paracord lanyard.

Specifications:

Bird & Trout #20BTJ
Weight: 0.8oz

OUTDOORSMAN

We have had a lot of friends ask us to bring back the Outdoorsman. So we have dusted off the tooling and made a new run. Only this time we have added two new improvements. The first is jimping on the blade back. This gives the thumb and index finger more control of the edge as they now have a non-slip platform to rest on. The second is a chopping edge, or bone breaker. In our tests, this edge hacked through everything we put in front of it, including heavy gauge steel wire, so it's sure to stand up in the field! As before, the Outdoorsman will come with a heavy leather sheath, fitted with a brush proof retaining strap.

Specifications:

Outdoorsman #18H
Weight: 9.9 oz.
Thick: 3/16"
Blade: 6"
Handle: 5" Kraton®
Steel: AUS 8A
Overall: 11"
Sheath: Black Leather

TRAIL MASTER SERIES

TRAIL MASTER® IN CARBON V®

REGULAR OR STAG HANDLED

The Carbon V® Trail Master® is, without a doubt, the most knife for the money ever built. In terms of sharpness, edge holding, strength and sheer cutting power, it will out-perform any factory made knife we know of and 99% of all hand forged knives as well. Unlike our competitors, we can prove that the claims we have made for the Trail Master® are true. You can see the evidence for yourself in our documentary video, PROOF.

The Stag Trail Master® features a handle made from the antlers of the Sanbar Stag. This material is prized for use in knife handles due to its great beauty and durability. The grip has a modified blade tang to accept the Stag round and a beautiful hand polished brass pommel.

Carbon V® Trail Master®

Carbon V® Stag Trail Master®

AUS 6A Stainless Trail Master®

San Mai III® Trail Master®

TRAIL MASTER® IN STAINLESS STEEL

AUS 6A OR SAN MAI III®

If you want a Bowie knife that requires minimum maintenance and is practically immune to water, salt, air, or the humidity of a jungle environment, the Stainless Trail Master® is for you!

Made from AUS 6A Stainless or San Mai III®, these knives will out-perform any other stainless steel Bowie in the world in terms of strength and toughness. As an added bonus, each Stainless Trail Master® comes with a beautiful rolled edge, capable of easily severing 4" or more of free hanging manila rope!

The Greek Kopis and The Roman Machaira were both possible inspirations for the Kukri. These ancient, forward curved blades were known for their tremendous chopping cuts. Cold Steel® takes great pride in being able to offer our versions of these historic blades.

KUKRI SERIES

MINI GURKHA LIGHT

Perhaps the most versatile of our Kukri Series, the Mini Gurkha Light is an incredible combination of strength and utility. Its distinctively curved blade of Carbon V® steel gives it the chopping power of its larger siblings, but at only 13.9 ounces it's a pleasure to carry.

The Mini Gurkha Light's Kraton® handle can be cradled in the palm for maximum control in dispensing camp chores or hacking your way through thick brush. The blade is black epoxy powder coated and fits snugly into its black leather sheath.

GURKHA KUKRI

The Gurkha Kukri will out-chop any factory or handmade knives, including swords twice its size — even expensive, hand forged Japanese Katanas.

Taking advantage of its downward curving blade and long, "V" shaped cross section, the Gurkha Kukri places its edge at an angle to a target, creating a powerful shearing effect.

The heaviest Kukri on the market, the blade is almost an inch wider near the tip than it is at the handle, which shifts the knife's balance point forward. This makes it possible for a substantial blow to be struck with minimal effort, using inertia alone to complete the cut.

GURKHA LIGHT

For those who prefer a lighter Kukri, we offer our Gurkha Light. At 16 ounces and sporting a 1/8" thick saber ground blade, it is a lighter rendition of our Gurkha Kukri.

LTC KUKRI

The curve of our LTC Kukri's blade is very important because no matter what part of the blade makes contact with a target, the edge is always presented at an angle. This creates a shearing motion, so that the edge slices through the target as the weight of the blade drives it deeper.

Specifications: Kukri Series

PEACE KEEPERS™

Are you tired of looking at those expensive, double edged knives that are so dull out of the box that they won't cut butter? Or that well known American model that's so brittle it can break if dropped in the sink? Well there is an alternative. The Peace Keepers™ — Cold Steel's® double edged knives that perform like nothing you've seen before.

Unlike most boot knives and daggers, the Peace Keeper's™ spear point offers considerable resistance to bending or breaking.

Available in Carbon V® for maximum strength or 420 Sub Zero Quench Stainless for lower maintenance, and treated with Cold Steel's® custom heat treatment, the Peace Keepers™ offer the utmost in strength, toughness, and superior edge retention.

RECON TANTO

Our superb Japanese Tantos are still unsurpassed for fit and finish, but financially they are beyond the reach of many knife lovers. Now we've combined classic Tanto styling, the strength of Carbon V®, and a comfortable, western-style handle in a very affordable package. The Recon Tanto is redefining the standard for combat knives. It is fast becoming the preferred fixed blade for SWAT teams and special military units.

Specifications: Recon Tanto #13RTK

R1 MILITARY CLASSIC

This classic WWII design has seen action in every major conflict around the globe, including Korea, Vietnam, Central America and the Persian Gulf.

Our R1 Military Classic is an exact replica of the original and offers unbelievable performance for less than half of the original price. Each knife is made to the most exacting Cold Steel® standards and represents quality you can bet your life on!

The R1 comes complete with a brown leather sheath, including a Norton Fine India stone and pouch.

Specifications: R1 Military Classic #14R1J

Weight:	9.25 oz.	Thick:	3/16"	Blade:	7"	Handle:	Linen Micarta
Overall:	11 3/8"	Steel:	AUS 8A Stainless with 300 Series Stainless Guard

R1 Military Classic

BLACK BEAR CLASSIC

First developed by Bob Loveless, one of the founding members of the Knifemaker's Guild, the Black Bear Classic is perhaps the quintessential combat knife. Its 8" blade offers excellent reach, and the sub hilt practically eliminates the possibility of the hand being dislodged or coming into contact with the blade. The Black Bear Classic comes complete with a black leather sheath which includes a Norton Fine India stone and pouch.

Specifications: Black Bear Classic #14BBCJ

Weight:	12.7 oz.	Thick:	3/16"	Blade:	8 1/4"	Handle:	Linen Micarta

SRK®

(SURVIVAL RESCUE KNIFE)

Survival/Rescue operations demand a versatile knife able to withstand the most extreme abuse. The SRK® (Survival Rescue Knife) was designed with this in mind. No expense was spared in steel, heat treatment, and construction. The blade is finished with a rich black epoxy powder coat which helps to protect the Carbon V® steel from the elements. At $\frac{3}{16}$ of an inch thick, the SRK® offers the sturdiest possible point and edge configuration, without sacrificing sharpness.

The SRK®'s handle sports a single quillion finger guard and a deeply checkered Kraton® grip.

Specifications: SRK® (Survival Rescue Knife) #38CK

Blade: 6" Black Epoxy Powder Coat Finish

Handle: 4 $\frac{3}{4}$ " Kraton®

Overall: 10 $\frac{3}{4}$ "

Thickness: $\frac{3}{16}$ "

Steel: Carbon V®

Weight: 8.2 oz.

Sheath:
Concealex™

BUSH RANGER™

The Bush Ranger™ fulfills a need for a rugged, light sheath knife that is large enough to be useful, yet small enough to wear on a belt every day.

The blade is flat ground for maximum shearing power, and the razor sharp edge curves continuously. This allows the blade to be used in a highly efficient draw cut as well as a chopping stroke, while the extra curve at the tip provides plenty of "belly" for emergency field dressing and skinning.

The hilt features a highly contoured cross section which resists the hand's backward movent (in response to centrifugal force) when chopping.

Specifications: Bush Ranger™ #37CF

Blade: 7 $\frac{1}{2}$ " Black Epoxy Powder Coat Finish

Handle: 5" Kraton®

Overall: 12 $\frac{1}{2}$ "

Thickness: $\frac{3}{16}$ "

Steel: Carbon V®

Weight: 8.8 oz.

Sheath:

Leather

RECON SCOUT®

In most respects the Recon Scout® is simply a 7 $\frac{1}{2}$ " Trail Master. It has the same steel, heat treatment, blade thickness, and blade shape. Only the satin polish has been changed, in favor of a rich, baked-on black epoxy finish. This helps to control rust, minimize light reflection and deliver years of rugged service. The blade is flat ground for maximum shearing power and the razor sharp edge is continuously curved along its entire length. This curve allows the blade to be used in a variety of cutting and chopping strokes. Plus, the extra curve near the tip provides plenty of "belly" for emergency field dressing. It is perhaps the world's finest combat knife.

Specifications: Recon Scout® #37C

Blade: 7 $\frac{1}{2}$ " Black Epoxy Powder Coat Finish

UWK™

Original SOG™ knives from the Vietnam era are extremely rare and replicas can be very costly. To remedy this situation, we have used modern materials and construction methods to make our own more reasonably priced version.

We call our SOG™ style knife the UWK™ and it follows the profile of the original very closely. The only changes made were to bead blast the blade and to utilize an integral Kraton® handle and guard.

In keeping with the UWK's™ tactical mission, we have included a thermo plastic sheath made of Secure-Ex™ with an adjustable Cordura belt loop.

Specifications: UWK™ #38UW

Blade: 6 $\frac{1}{2}$ " Bead Blast Finish

Handle: 4 $\frac{7}{8}$ " Kraton®

Overall: 11 $\frac{3}{8}$ "

Thickness: $\frac{3}{16}$ "

Steel: 420 Sub Zero Quench

Weight: 7.1 oz.

Sheath: Secure-Ex™

ODA™

The ODA™ is designed to be a less expensive version of our own Military Classic. Instead of a highly polished blade, the ODA™ features a bead blasted finish and an integral Kraton® guard/handle which substitutes for the Military Classic's Micarta grip and stainless guard. The deeply checkered Kraton® offers an even better grip than Micarta does and is equally durable.

Instead of the leather sheath and stone, the ODA™ comes with a high tech Secure-Ex™ model. Secure-Ex™ is far more cut resistant than leather is and won't rot, crack or warp when exposed to wet or harsh weather.

Specifications: ODA™ #38DA

Blade: 7" Bead Blast Finish

Handle: 4 $\frac{3}{4}$ " Kraton®

Overall: 11 $\frac{3}{4}$ "

Secure-Ex™

OSS™

The OSS™ sub-hilt fighter offers all the advantages and performance of a custom knife at a fraction of the price. The double edged blade is sub zero quenched for strength and edge retention and comes razor sharp. For the ultimate grip the handle, guard, and sub-hilt are injection molded in one integral piece of Kraton®. This saves unnecessary costs while delivering the durability, security, and control the sub-hilt is famous for.

To house the blade safely, yet leave it ready for instant use, every OSS™ comes with a high tech tactical style sheath made of Secure-Ex™ and Cordura.

Specifications: OSS™ #38SS

MINI TAC™

Reliable and ready, Cold Steel's® new Mini Tac™ is setting the standard in neck knife performance.

The Mini Tac™ is light enough to be carried with ease, while placing awesome utility at your fingertips. Its 4-inch drop point tanto blade is fashioned of extra thin and wide AUS 6A Stainless Steel for maximum cutting power and control. The flat, thin Kraton® handle is deeply checkered and refuses to roll in your grip. The heavy duty Concealex™ neck sheath is injection molded and holds the knife securely while allowing for a lightning draw.

HAI HOCHO™

Our newly updated Hai Hocho™ or "yes knife" (in Japanese) can do it all! It's perfect for cooking, camping, fishing, boating, wherever you need a sharp, handy knife. The secret to its versatility is its thin, wide blade. This blade configuration has proved equally adept at cutting, slicing and slashing and will slice an apple like it was butter. To make it even more useful, the Hai Hocho™ comes with a high tech Secure-Ex™ sheath and steel bead lanyard so you can carry it in your glove box, purse, pack, tackle box, or hang it around your neck where its super light weight will scarcely be noticed.

KITCHEN SERIES

We studied hundreds of different kitchen knives and were amazed by the poor quality of dull, often warped blades. So, we set out to make the finest in kitchen cutlery. Available in both 5 and 7-inch lengths, Cold Steel's® kitchen knives are the sharpest of their kind in the world.

Flat ground and honed to a superb serrated edge, these AUS 8A blades are a joy to use. For even greater control, we've lengthened, slightly thickened, heavily contoured and deeply checkered the Kraton® handle with a more aggressive pattern. Now your kitchen duties can be done with the ease of Cold Steel® precision and performance.

AUS 6A with Kraton® handles. Includes Concealex™ neck sheath.

PARA EDGE™

Cold Steel's® Para Edge™ neck knives are as light as a feather. They offer fixed blade performance in a pocket knife sized package. Weighing in at a mere 2 ounces including sheath and paracord lanyard, they can be comfortably worn 24 hours a day. Suspended from the neck outside of clothing, they make a handy utility or rescue knife.

Each Para Edge™ comes with a rugged, high performance AUS 6A Stainless blade ground to a thin, razor sharp edge and safely housed in a tough Concealex™ sheath.

Para Edge™ Double
Edged Point

MINI PAL™

The Mini Pal™ delivers heavyweight performance. The edge zips through a host of materials at unbelievable speed. The 1" long blade is razor sharp, to open delicate packages and envelopes, cut rope or punch through heavy cartons. Plus the unique handle offers a variety of grips that would be impossible with any other design. It comes with a Zytel® lanyard sheath.

	Specifications:	
	Mini Pal™ #43NS	Ready Edge™ #42NS
Blade:	1"	2"
Handle:	1 5/8"	2 1/4"
Overall:	2 3/8"	4 1/4"
Thick:	5/64" (2mm)	3/32" (2.5mm)
Weight:	0.5oz.	1.3oz.

READY EDGE™

With a grip similar to the Para Edge™, the Ready Edge™ sports a smaller 2" spear point blade. The blade is double hollow ground with our distinctive serrated edge. It comes with a convenient lanyard sheath. Scuba Divers are using it, and it's become a favorite among fishermen in Alaska for cutting nets and heavy line.

A Concealex™ neck sheath similar to the one that comes with the Para Edge is available for the Ready Edge (Sheath: #SK42NS). Sold Separately.

Weight:	0.7oz.	0.8oz.

420 Sub Zero Quenched steel with Kraton® handles.

Both the Urban Pal™ and Super Edge™ come complete with a tough Secure-Ex™ sheath with key ring

URBAN PAL™

The Urban Pal™ should be standard equipment for survival in today's urban jungle. At less than half an ounce, it's perfectly at home in a pocket or purse and can be easily attached to a key ring, or hung around the neck. With a 1 1/2" long blade, it's big enough to get the job done and its unique handle allows you to really put your weight into its point or edge.

SUPER EDGE™

The Super Edge™ is a hard working, sheath knife in the very smallest package available. This rugged little workhorse can cut through tough materials that would make a bigger knife "choke". Its diminutive overall length and feather light Secure-Ex™ sheath make it a natural for attachment to a key ring, zipper pull, "D" ring or belt loop. It's so light and comfortable to carry you'll never notice it when it's casually looped around your neck, conveniently laced to your shoe or cunningly pinned inside the crown of your hat.

Urban Pal™

Super Edge™

Specifications:

	#95BUS Bushman®	#95BUSM Mini Bushman®
Blade:	7"	4 3/4"
Overall:	12 1/4"	9 1/8"
Thick:	3/32"	3/32"
Weight:	10.1oz.	7.6 oz.

Cold forged SK-5 High Carbon Steel.

Both include a leather sheath. The sheath features a hard plastic liner for safety.

BUSHMAN®

Unlike most hollow handle survival knives, the Bushman® has no joint or seam between the blade and handle that requires a mechanical fastener. Instead, the Bushman's® blade and integral handle have been expertly cold forged out of a single piece of 2.5mm thick SK-5 high carbon steel. The resulting knife has been expertly heat treated and tempered to RC54 and, when subjected to factory tests, has withstood over two tons of pressure on its blade/handle transition!

The **Mini Bushman®** is identical to its big brother in every respect, except it's approximately 3/4 the size of the original Bushman.® We think its smaller size will make it a natural for stuffing into a rucksack, tackle or tool box, or even your glove compartment. It also makes a great hunting knife as it's guaranteed to be unbreakable and will prove ideal as a first knife for the new outdoorsman in your family.

SPEARS

For people who have everything, here's something new! Our spears make for a unique, and athletic target throwing experience! Like traditional spear heads, ours are heat treated and then drawn to a tough spring temper. This process enables the spear head to flex or bend under impact stresses rather than break.

The **Assegai**, invented by the legendary Zulu king Shaka in the early 1800's, revolutionized tribal warfare in Southern Africa. Our version is available with your choice of two different shaft lengths, and two different head sizes!

The **Javelin**, is a superb throwing spear! With its light head, it sails through the air with minimal effort.

The **Boar Spear**, is a modern re-creation of a design that dates back to the European Renaissance. It is cold forged out of medium carbon SK-5 Steel and, like our other spears, is heat treated to a spring temper. The Boar Spear comes with an extra stout premium ash shaft.

The **Samburu Spear**, is based on a design used by the Samburu tribe from Kenya's northern frontier. It is perhaps the most advanced spear of its type on the planet. With this extraordinary spear, warriors routinely dispatch marauding leopards, lions and even firearm toting bandits at unheard of distances.

LATHI (LAH-TEE)

India is a society of over a billion people speaking hundreds of different dialects and worshipping through a multitude of religions.

Strife and civil disorder can flare up and often the only defense against anarchy is the Indian police, who rely on one main weapon in crowd control... A four foot long Lathi! Issued as standard equipment, the reason for the Lathi's popularity as a crowd control device is its versatility and non-lethal effectiveness.

Four feet, is the standard police length in India, a good practical sized Lathi.

At **six feet**, the Lathi becomes an excellent hiking or camping staff. In fact it has sufficient length so that it can be cut to exactly fit the user. With the bark left on these sticks they are virtually impervious to the elements.

Our **Three Foot Training Stick**, made out of the same tough rattan as our Police Lathi, is approximately three feet long and is three quarters to one inch in diameter.

Anyone who has difficulty in walking, maintaining their balance, traversing rough, hilly terrain, or suffers from back, knee, or hip pain will benefit from the **Crook Top Cane**. It's stylish and sturdy and will provide support wherever you go.

Specifications: Rattan Sticks

	#91TS 3 ft. Training Stick	#91CTC Crook Top Cane	#91PL4 4 ft. Lathi	#91PL6 6 ft. Lathi
Length:	36"	36"	48"	72"
Diameter:	3/4" to 1"	3/4" to 1"	1 1/8" to 1 1/4"	1 1/8" to 1 1/4"
Weight:	13.7oz.	10.7oz.	1lb. 3 oz.	2lb. 2.7 oz

All weights and measures for sticks are approximations.

A word about rattan...
Despite its resemblance to bamboo, Rattan is not hollow. It is composed of thousands of tough, thin fibers that are densely packed together and encased in a smooth hard skin. This construction gives it enormous strength and substantial flexibility. Rattan sticks flex rather than break. So when they strike hard objects, they absorb shock rather than transfer it to the user. The bark is left on because it adds tremendous strength to the rattan. In fact, when combined with the fiber core, it is tough enough to offer good defense against even edged weapons. Our Lathis are made of select Rattan of the highest quality. They are picked for us by one of the major suppliers of Lathis to the Indian Government.

LATHI VIDEO... THE BLOW OF THE RATTAN

In cooperation with Windlass Steel Crafts, we present our video on the history and use of the Lathi throughout India.

Shot by professional film makers in color, this superb quality, 60 minute video will give an in depth look at how to use a Lathi. There are numerous demonstrations and competitions, and a good overview of other unique and effective Indian weaponry. (#VBOR)

SPECIAL FORCES SHOVEL

The Special Forces Shovel is modeled after the original Soviet Spetsnaz shovel. The Spetsnaz were the Soviet army's most elite unit, and were renowned for their deadly efficiency.

Trained to travel light, the Spetsnaz packed only the bare essentials. One of their favorite tools was their unique shovel which featured a broad flat blade and three sharp edges for maximum versatility.

Our shovel follows the Soviet design as faithfully as possible with improvements in the steel (twice as thick) and heat treatment.

BAD AXE

Like the Special Forces Shovel, the Bad Axe is made of medium carbon steel, over 2mm thick and fully heat treated for strength. The edges of the Bad Axe have been factory honed to a sharp utility edge that can easily be improved to razor sharpness without much effort. The handle is of premium hardwood finished in clear lacquer.

The twin edge design offers double the cutting potential. When one begins to dull the other is razor sharp. Plus the axe cuts in either direction. It has the necessary weight for serious chopping, and for throwing, it's a dream! With all its points and cutting surfaces, it will stick in virtually any position.

Specifications: Bad Axe and Special Forces Shovel

	#92SF Special Forces Shovel	#92BX Bad Axe
Overall:	19 ¹¹ / ₁₆ "	20"
Thick:	5/ ₁₆ "	5/ ₁₆ "
Weight:	26.6oz.	26oz.
Width:	6"	8 ¹ / ₈ "

Medium Carbon Steel with a hardwood handle.

A leather sheath is available for the Special Forces Shovel (#SL92SF). Sold separately.

DROP FORGED TOMAHAWKS

WAR HAMMER

Medieval war strategists developed this effective solution to the problem of plate armor, which is impervious to most swords but completely vulnerable to a weapon like the War Hammer.

Now Cold Steel® introduces an effective re-creation. Featuring an enormous hammer face (1¹/₂" square) and a 3¹/₂" spike, the War Hammer is one awesome weapon.

The straight grain American Hickory handle is 30" long and provides tremendous leverage, and, to protect the handle, a pair of sturdy steel langets are included.

BATTLE AXE

After the club—the axe is man's second oldest weapon. It was used throughout antiquity from Egypt through the Fall of Rome. The Vikings found it practical and it remained in use through the Renaissance. Even the invention of gun powder didn't stifle the axe and it continued to be employed as a naval boarding weapon right up to World War I.

Since we wanted our Battle Axe to be easily wielded with two hands, we have kept its weight down and borrowed the 30" hickory handle and steel langets that appear on our War Hammer. With these items properly installed and the edge honed to razor sharpness, our Battle Axe will rival the finest weapons of old.

RIFLEMAN'S HAWK

This superb tomahawk features a factory honed cutting edge. It has two sticking points on its cutting edge for throwing and throws extremely well.

The Rifleman's Hawk has a traditional American hammer-head style butt for hammering stakes.

FRONTIER HAWK

The Cold Steel® Frontier Hawk is our lightest and smallest tomahawk. Its light weight makes it a highly functional camp hatchet, while causing minimal fatigue to wrist, elbow and shoulder.

NORSE HAWK

The Norse Hawk's 4" blade features a highly curved cutting edge and terminates in two sharp points. These points increase the chance of a stick when the Norse Hawk is thrown.

Specifications: Drop Forged Tomahawks

	#90BA Battle Axe*	#90WH War Hammer*	#90RH Rifleman's Hawk	#90F Frontier Hawk	#90N Norse Hawk
Primary Edge:	5 ¹ / ₄ "	1 ¹ / ₂ " Square (Hammer Face)	3 ¹ / ₂ "	3 ¹ / ₂ "	4"
Overall:	30"	30"	19"	19"	19"
Hawk:	6 ¹ / ₂ "	7 ³ / ₈ "	8 ¹ / ₈ "	5 ¹ / ₂ "	5 ¹ / ₂ "
Weight:	43.5 oz.	39.8 oz.	32oz.	20.4oz.	22.6oz.

Drop Forged 5150 Steel with Straight Grain American Hickory handles. Weights are approximate. *Some assembly is required on the War Hammer and the Battle Axe. Instructions are provided.

War Hammer

Battle Axe

Rifleman's Hawk

Frontier Hawk

Norse Hawk

Our tomahawks are precision drop forged from medium carbon 5150 steel. During the forging process a metal ingot is heated almost white hot and then formed into shape in a series of progressive dies. During this forming process the steel is kneaded and compressed into a completely homogenous mass. Like all good tomahawks, these are differentially heat treated. This means that the cutting edge and hammer face is fully hardened, while the balance of the head is left relatively soft to absorb the shock of striking blows.

Specifications: Sjambok

- #95SAS 36" Sjambok
- #95SA 41" Sjambok
- #95SAXL 54" Sjambok

Extruded virgin black plastic.
Diameter at butt: 1"
Diameter at tip: 3/8"

SJAMBOK

In Africa, the Sjambok is a cattle prod, a whip, a riding crop and a means of self protection. Its considerable reach, lightning speed and devastating impact have also built it quite a reputation as a sure defense against deadly snakes.

And since the Sjambok is swung like a rod, not cracked like a bull whip, its weight, speed and flexibility does all the work and little physical strength is required.

SYNTHETIC SJAMBOKS

Our Sjamboks are made from precision molded black plastic. They are the same kind used by the South African Police.

ZYTEL® KNIVES

Made from 43% glass-filled Zytel® nylon which has been UV and heat stabilized to be impervious to the elements. The ratio of glass to nylon is the highest available, making points tougher, longer lasting and easy to re-sharpen with a nail file.

NOTE: The CAT Tanto and Delta Dart are sold to law enforcement and military personnel only.

CAT TANTO

The CAT Tanto is a Zytel® reproduction of Cold Steel's® original Tanto! It shares all of the design features that made the Tanto so popular, including the sure-grip handle shape and reinforced point.

DELTA DART

The Delta Dart is 8 inches long and a half inch in diameter, yet it weighs only seven tenths of an ounce! The comfortable handle is knurled for a positive grip.

Specifications: CAT Tanto & Delta Dart

	#92CAT CAT Tanto	#92DD Delta Dart
Blade:	5 3/4"	3 1/2"
Overall:	11 1/4"	7 7/8"
Thick:	1 1/64"	1/2"
Weight:	3.2oz.	0.7oz.

A Concealex™ neck sheath is available for the Delta Dart (#SK92DD). Sold Separately.

1917 CUTLASS

Our modern re-creation of this classic fighting sword is as authentic as possible. The 1917 Cutlass features the signature 1 1/4" wide curved blade with a short clipped point. It's sharp, yet sturdy enough to resist bending or breaking.

Just like the original, our version features a half basket guard stamped out of heavy 18-gauge carbon steel and blued (to resist rust) to match the blade. The handle is fashioned from carefully shaped hardwood painted brown and secured to the full tang by three heavy brass cutler's rivets. The reproduction scabbard is made entirely of high quality leather, brass and copper.

Specifications: 1917 Cutlass #88CS

Blade:	24 1/4"
Overall:	29 3/8"
Thick:	1/5"
Weight:	33.7oz.
1050 Carbon Steel	
Includes leather scabbard. (right)	

THROWERS

TRUE FLIGHT THROWER

Sure, there are a lot of throwing knives on the market, but they all seem to be made out of cheap steel that bends or worse, stainless steel that breaks. That's why Cold Steel® made the True Flight Thrower.

Our True Flight Thrower beats the competition, hands down. We use our own exclusive Carbon V® Steel for a hard, yet resilient blade that will "bounce-back" from any throw. For versatility, we have given it a utility edge that will stand-up to your toughest chores.

MINI FLIGHT THROWER

SURE FLIGHT THROWER

PRO FLIGHT THROWER

We know you'll love the "professional style" of our Mini Flight, Sure Flight, and Pro Flight throwing knives. Because these knives have all the features you're looking for in a top quality thrower. Each knife is perfectly balanced for throwing and will accommodate either a blade or handle oriented throwing style. And, due to their super tough Carbon V® construction and durable black epoxy coat finish, they'll stand up to literally thousands of throws. They have incorporated into their design a strong, yet very sharp, Sure-Stick™ point that guarantees a hard hit and superb penetration every time.

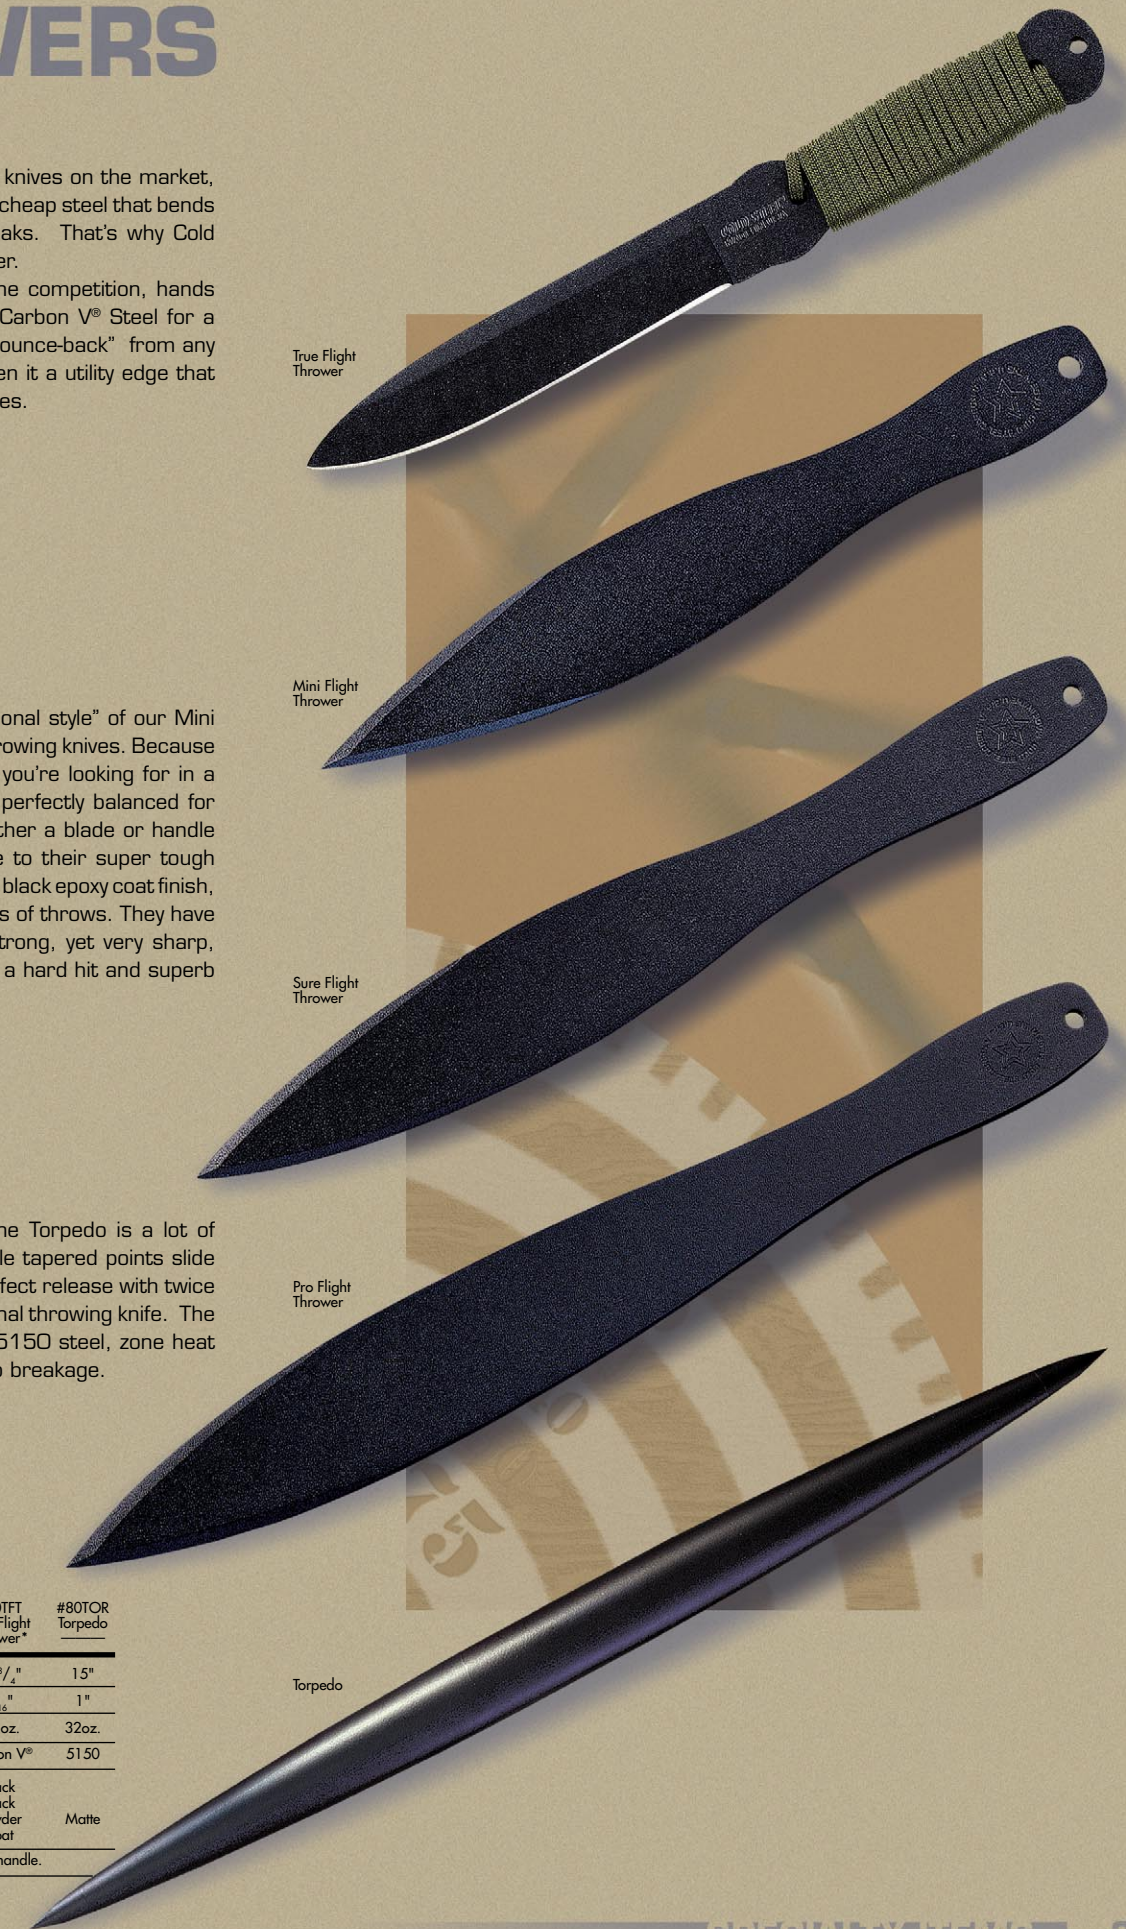

THE TORPEDO

Heavy and perfectly balanced, the Torpedo is a lot of fun for target throwing. The double tapered points slide effortlessly from the hand for a perfect release with twice the sticking potential of a conventional throwing knife. The Torpedo is made from cold rolled 5150 steel, zone heat treated for maximum resistance to breakage.

Specifications: Throwers
