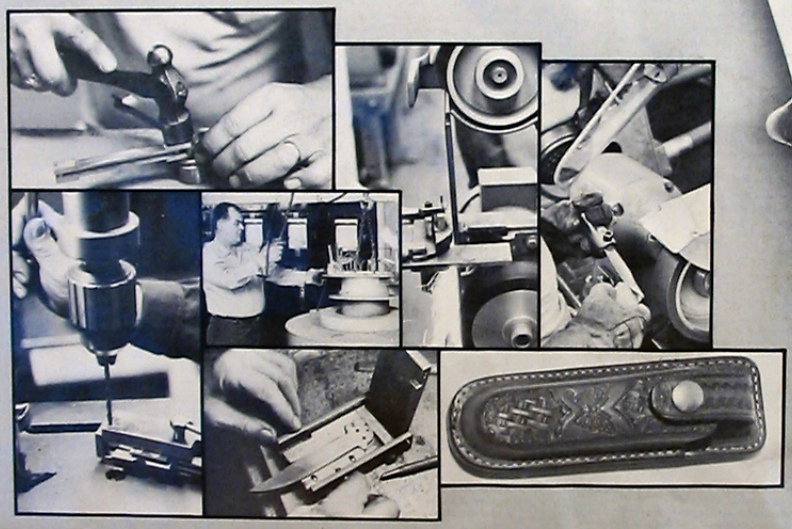
The Only U.S. Manufacturer

We at Bali-Song are proud to be the only U.S. manufacturer of the Original Bali-Song, "butterfly knife of the Orient". We've modified the original 1872 design in both overall performance, materials and quality craftmanship. Through extensive research and testing we've created what we believe to be the most dependable and durable folding knife available anywhere today. This unique and multi-faceted knife offers the ultimate in blade protection through our revolving twin-handle design and a positive-loc blade, for overall strength.



Individually Hand Crafted

Each of our knives are custom hand-made to its own blade. We precision fit solid brass or stainless steel handles, and hand tailor the beautiful Micarta inlay of your choice. At Bali-Song we take pride in our product using nothing but the best materials and methods. We are one of the only commercial knife companies in the world that uses 154cm stainless steel exclusively in our blades. Because of the exceptional edge holding capability of this steel and our special heat treating method, our blades are tough enough to hold an edge without being brittle. Some of our other unique features include -

- Full hollow ground 154cm stainless steel blade, 3/16" thick, heat treated to a Rockwell hardness of 59.
- All handle material is taken from solid stock and Milled to specifications.
- Acid etched logo to prevent stress points in blade, unlike ordinary stamping techniques.
- With two fully-machined, stainless steel pivot pins and locking pin, this knife offers twice what the average folding knife possesses in strength, blade stability and overall quality.
- This unique three-point locking system for the blade is the strongest folding design available.
- Finest quality hand-tooled leather belt pouch for maximum protection and easy access.
